

Made Smarter West of England

Unlock Your Manufacturing Potential in Bristol

The manufacturing landscape is evolving rapidly. To stay competitive, Bristol-based SMEs must embrace digital transformation. The **Made Smarter West of England** programme is a government-backed initiative designed to help you adopt industrial digital technologies, boosting your productivity, efficiency, and growth. This is your opportunity to innovate, automate, and lead the market.

Key Programme Benefits

Expert Guidance	Receive a fully funded 1:1 digital roadmap assessment from specialists at the National Composites Centre.
Grant Funding	Access 50% match funding grants of up to £20,000 to invest in new hardware and software.
Skills Development	Upskill your team with digital leadership training and leverage fully funded student interns from UWE Bristol.

How Technology Wizard Ltd Can Help

Navigating grant schemes can be complex. Technology Wizard Ltd is your trusted partner to simplify the process and maximise your return on investment. We help you:

- **Strategise:** Translate your digital assessment into a practical, high-impact technology roadmap.
- **Implement:** Select, procure, and integrate ideal technologies funded by the grant, from AI and robotics to cloud solutions.
- **Succeed:** Provide expert assistance with grant applications and project management for seamless transition.

Frequently Asked Questions

Who is eligible to apply?	Manufacturing SMEs in Bristol, Bath & NE Somerset, or South Gloucestershire with fewer than 250 employees.
What can the grant fund?	Digital technologies like 3D printing, AI, robotics, IoT sensors, and system integration software.
Is the funding competitive?	Funding is awarded on a first-come, first-served basis, so early application is encouraged.
Do I need to match the funding?	Yes, the grant provides 50% match funding up to £20,000. For example, if your project costs £40,000, you receive £20,000.
